tazdan

06 · PRODUCT DEMO

Feature coverage index

Every feature in the 3:37 demo video: when it appears, what it shows and its status today. Includes a still of each screen and what the video does not cover.

Investor pack	Date	Status
Document 06	October 2026	Confidential · for discussion

Prepared by the founder of Tazdan for prospective investors. This document is not an offer to sell or a solicitation to buy securities. Forecasts are planning estimates, not promises. Licences, banking partners and live payment rails are not yet in place; status labels throughout show what is built, what awaits a partner, and what is switched off in production.

THE VIDEO, FEATURE BY FEATURE

29 features in 8 chapters

File: **Tazdan_Product_Demo.mp4** (1920×1080, 3:37, silent with on-screen captions). Status today: 20 built · 5 awaiting a partner · 4 off in production

TIME	CHAPTER	FEATURE	WHAT THE CLIP SHOWS	STATUS
0:00	Title card and recording notice			
0:05	Everyday money	**Home and balances**	Every currency and asset in one balance, with contacts and recent activity a thumb away.	Built
0:15	Everyday money	**Top up**	Bank transfer, P2P and cash top-up methods, each with its own instructions.	Built · awaits bank accounts
0:22	Everyday money	**Send to anyone**	Pay by @handle, phone or contact. Risk checks and step-up verification run before money moves.	Built
0:32	Everyday money	**Receive by handle or QR**	A personal @handle, payment link and QR code that anyone can pay.	Built
0:38	Everyday money	**Claim links**	Send money to someone who is not on Tazdan yet. They join to claim it, so every payment is an invitation.	Built
0:43	Everyday money	**Activity and receipts**	Every transaction with its reference, pending claim links and a receipt.	Built
0:48	Everyday money	**Statements**	Audit-ready PDF statements by period and currency, with balances, fees and the full ledger.	Built
0:53	Social payments	**Messaging**	Conversations with contacts, so money and messages live in the same place.	Built
1:02	Social payments	**Pay inside a chat**	Send money within a conversation and get a receipt in the thread.	Built
1:12	FX and markets	**Currency exchange**	Convert between currencies. The rate includes the spread, and it is shown before you confirm.	Built · awaits FX permission
1:18	FX and markets	**Buy digital assets**	Quote, fees and confirmation in one flow, with limits checked before the confirm step.	Real-money trading off
1:25	FX and markets	**Asset detail**	Live charts, holdings and performance for each asset.	Built · market data
1:32	FX and markets	**Portfolio**	Allocation and performance across holdings.	Built
1:37	FX and markets	**Recurring buys**	Schedule purchases weekly or monthly from a chosen balance.	Off with trading
1:42	Cross-border	**Send abroad**	Corridor quote, recipient, review and tracking. Twelve corridors are configured, including the UK, Egypt, Turkey, UAE, the euro area and Tunisia.	Sandbox · payout partner pending
1:52	Cross-border	**Withdrawals**	Withdraw any balance to a bank or wallet, with screening and risk review on every request.	Built · manual bank payouts
1:57	Cross-border	**Linked banks and cards**	Manage payment methods in one place.	Awaits bank and card partners
2:03	Cross-border	**Cards**	Virtual and physical card controls and card activity.	Off until an issuer is signed
2:11	Savings and community	**Savings goals**	Goals like Hajj 2027, with scheduled contributions and a lock until the goal date.	Built
2:20	Savings and community	**P2P marketplace**	Person-to-person offers with escrow and disputes. Sellers show a first name, last initial and coarse area only.	Built · off by default in production
2:28	Savings and community	**Referrals**	A personal code with tracked invites and rewards for both sides.	Built
2:33	Trust and security	**Identity verification**	Three verification levels. Limits are shown live and before any confirm step.	Built · manual review
2:38	Trust and security	**Security centre**	Two-factor authentication, trusted devices and remote sign-out of other sessions.	Built
2:48	Trust and security	**Privacy mode**	Hide balances with one tap in public. Market prices stay visible.	Built
2:57	Business	**Business accounts**	Verified business profiles with bulk pay and a second approver above set thresholds.	Built · internal recipients
3:07	Business	**Team and roles**	Owner, admin, analyst and developer roles with invitations.	Built
3:12	Business	**Payout approvals**	Batches wait for approval above the dual-control threshold, then show their status line by line.	Built
3:17	Business	**API keys and webhooks**	Scoped, expiring API keys and signed webhooks for business integrations.	Built
3:22	Arabic	**Full Arabic, right to left**	The app in Arabic with a right-to-left layout. Currency names and amounts stay left to right.	Built
3:30	Summary card			

HOW IT WAS RECORDED

Real app, fictional customer

Every clip was recorded from the Tazdan mobile app itself (the same code that ships to phones, run as a web build at iPhone size and 2× resolution). It shows a fictional, fully verified customer, Amira (@amira), with invented contacts, balances, rates and history.

Every server response is a prepared fixture. No database, payment rail or real money was involved, and no customer data appears anywhere.

Edits. Long flows play at up to 1.4× speed, and short screens hold on their last frame so the captions can be read. One on-screen label was removed: the chat screen's "End-to-end encrypted" badge, because that claim has not been independently verified.

Status labels follow the platform's feature matrix: Built works end to end without outside activation; Awaits partner needs a bank, licence or payout partner; Off is refused in production until its conditions are met.

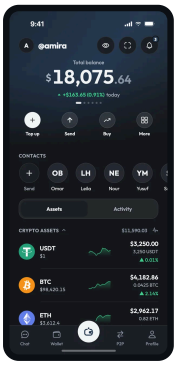

Not shown in the video

AREA	WHAT EXISTS	STATUS
Control Cockpit (web)	32 staff pages: global search and customer 360, KYC, deposit and withdrawal queues, maker-checker approvals, kill switches, remittance centre, FX overrides, treasury pools, providers, reconciliation, compliance cases and watchlists, fraud graph, support escalations, finance, system health and the audit log	Built
In-app staff screens	25 administrator screens in the mobile app for queues, rates, fees, users and diagnostics	Built
Onboarding	A six-scene animated introduction, sign-up, email verification and two-factor setup	Built
Arabic everywhere	The video shows the Arabic home screen; the app's other screens are also translated, with right-to-left layout	Built · device QA pending
Public business API	Balances, rates, payouts and signed webhooks, with idempotency keys	Built

A live demonstration of the app and the Control Cockpit, on the same fictional data, is available on request.
