INVESTOR PRESENTATION · OCTOBER 2026

The money app for Libya.

Wallets, payments, messaging, FX, savings, cross-border transfers and business payouts in one Arabic and English app, with bank-grade controls built in.

Confidential. Not an offer of securities. Forecasts are planning estimates. Licences and live payment partners are not yet in place.

THE PROBLEM

Money in Libya is hard to hold, move and convert

Cash is scarce

Branch queues and withdrawal limits make cash slow to get, yet payments between people still run on notes.

Rates are hard to see

People compare informal quotes by word of mouth and rarely see the full cost before they commit.

Abroad is costly

Families paying for study, treatment and support abroad face slow channels, unclear fees and no tracking.

Banks aren't mobile

Shops, freelancers and employers lack a simple way to pay, get paid and keep records.

$2.68bn
foreign-currency transfers by Libyan banks, Jan–Sep 2026

$6.51bn
foreign exchange for personal purposes, same period

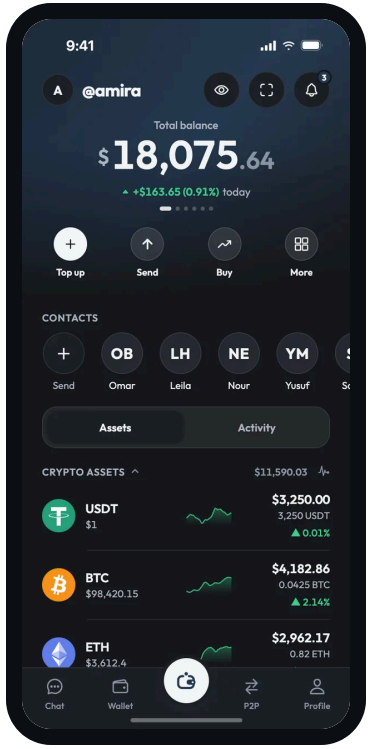

$19.3bn
total bank foreign-exchange use, same period

Source: Central Bank of Libya, uses of foreign exchange to end of September 2026. Context only; no market share is inferred.

WHERE IT STANDS

Built and tested, ready for its partners

82
mobile screens, Arabic and English

32
pages in the staff Control Cockpit

400+
API endpoints, including a public business API

370
server tests passing against a real database

12
remittance corridors configured (sandbox)

72–122
engineer-months to rebuild (estimate)

Of 29 features in the demo: 20 built · 5 await a partner · 4 off in production

tazdan

BUSINESS MODEL

Consumers bring volume. Institutions bring margin.

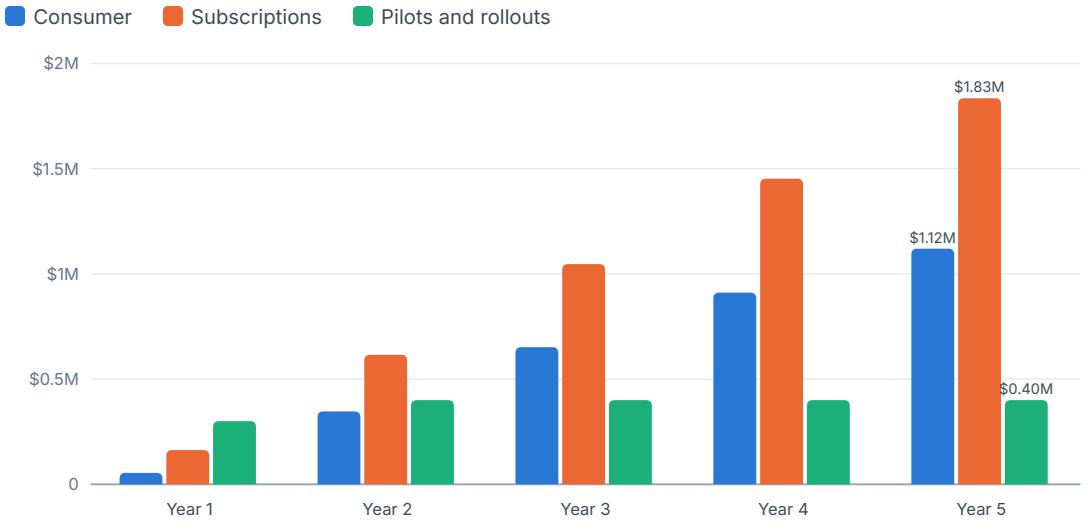

Consumers

Free payments between users spread the network. Revenue comes from conversion and cross-border transfers: 0.10% fee plus up to 0.35% FX margin, shown before confirm. 0.45% all-in, under a 0.50% guardrail.

Institutions

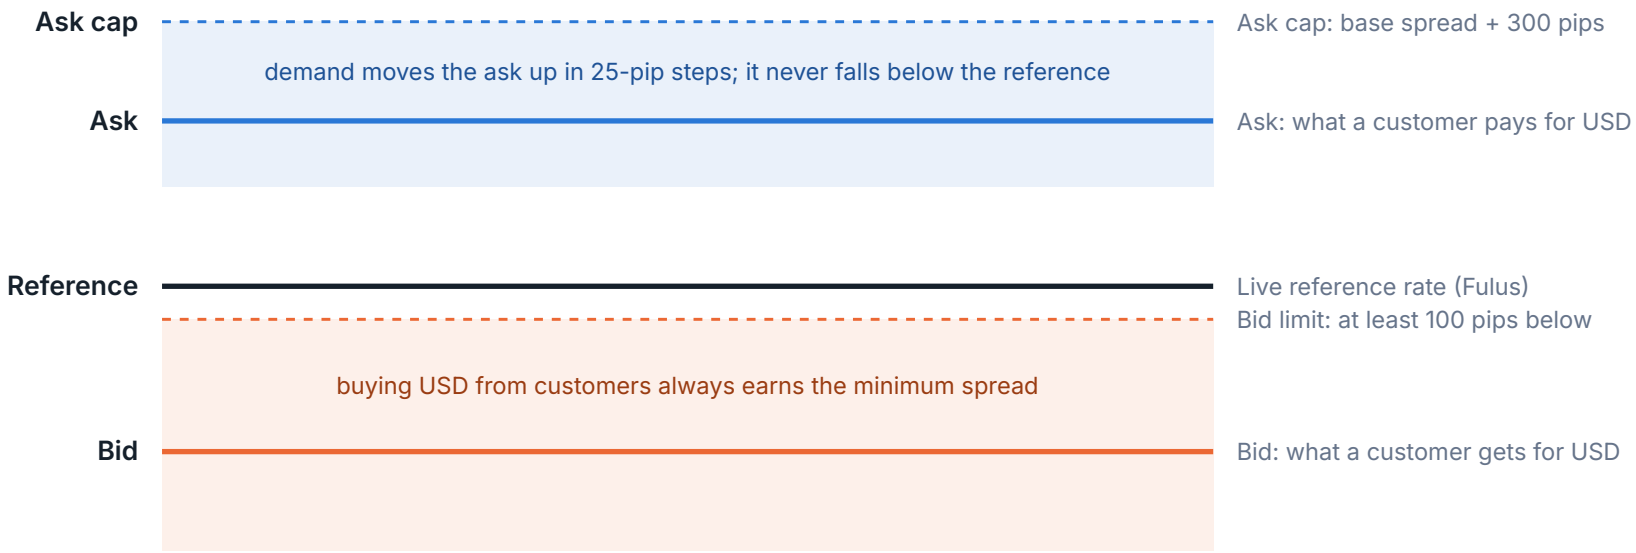

Banks and payment providers license Tazdan's operations software: reconciliation, exceptions, treasury, approvals. $25k pilot · $75k rollout · $120k a year.

Base-case revenue by stream

tazdan

Every LYD price, one controlled engine

- **Two-sided quote** around a live reference rate; the spread is shown before confirm.
- **Floor and caps:** the ask never drops below the reference, and demand can lift it by at most 300 pips.
- **Fair signal:** skew needs at least three customers; round trips cancel; each customer's influence is capped.
- **Safety:** stale data widens quotes, then halts them; kill switches; settings change only by approved request.

tazdan

UNIT ECONOMICS

One LYD 6,000 transfer, line by line

CUSTOMER	AMOUNT
Sends	LYD 6,000.00
Fee (0.10%)	LYD 6.00
Rate (reference 6.0000)	6.0210
Recipient receives	**$995.52**
All-in cost	0.45%

COMPANY	USD
Fee + FX margin	$4.48
Partner share	($0.45)
Rail, losses, slippage	($2.40)
Contribution	**$1.64**

Thin by design: the consumer line builds volume and trust, and it pays back a $30 acquisition cost in about 21 months. Each extra 0.10% of approved margin adds about $0.25M of year-5 revenue.

tazdan

GO TO MARKET

Win the street, then the corridor

Streets

Queue crews outside banks and markets, pop-up rate desks, 20 campus ambassadors.

Shops

300 merchants in 90 days, phone-shop alliance, payroll wedge, driver fleets.

Phones

Claim links by default, @handle land-grab, referral sprints, opt-in Rate Watch.

Moments

Eid money by link, Ramadan nights, Hajj savings, weddings, football.

3,784
active customers by month 12 (base)

10,419
by month 24 (base)

$30
target cost per settled customer

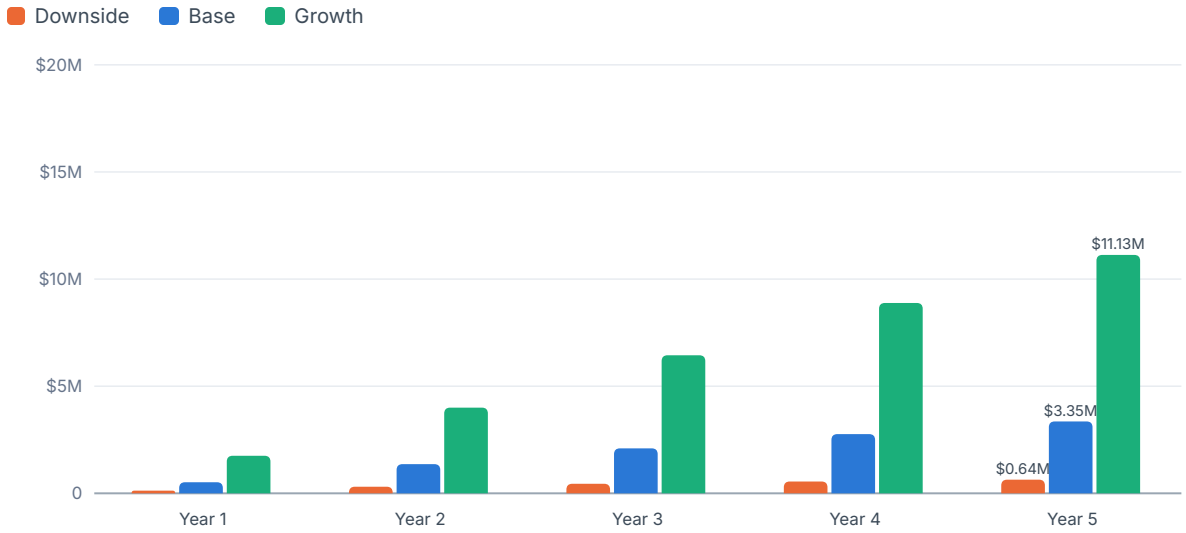

$18k
monthly budget, year 1

Aggressive in reach, strict in claims: no bots, spam or fake reviews; every financial claim human-approved; rewards only after verification and a settled transaction.

tazdan

FINANCIAL OUTLOOK

Five years, three cases

YEAR 5	DOWNSIDE	BASE	GROWTH
Revenue	$0.6M	$3.4M	$11.1M
Operating result	($0.7M)	≈ 0	$4.2M
Active customers	5,309	25,626	70,339
Software run-rate	$0.4M	$2.0M	$5.5M
Transfer volume	$34M	$277M	$1149M

Revenue, USD. Planning estimates from the integrated financial model; no pricing approval, provider contract or customer behaviour has been observed yet.

tazdan

CAPITAL

Most of the $10 million stays on the balance sheet

USE OF $10M (BASE CASE)	USD
Settlement prefunding (peak)	$6.2M
Collateral reserve	$1.0M
Losses and setup, 5 years	$2.1M
Lowest free cash	**$0.5M**

Prefunding is working capital in payout pools, not spending. The growth case needs about $5.9M more liquidity by year 5, best met by a settlement facility.

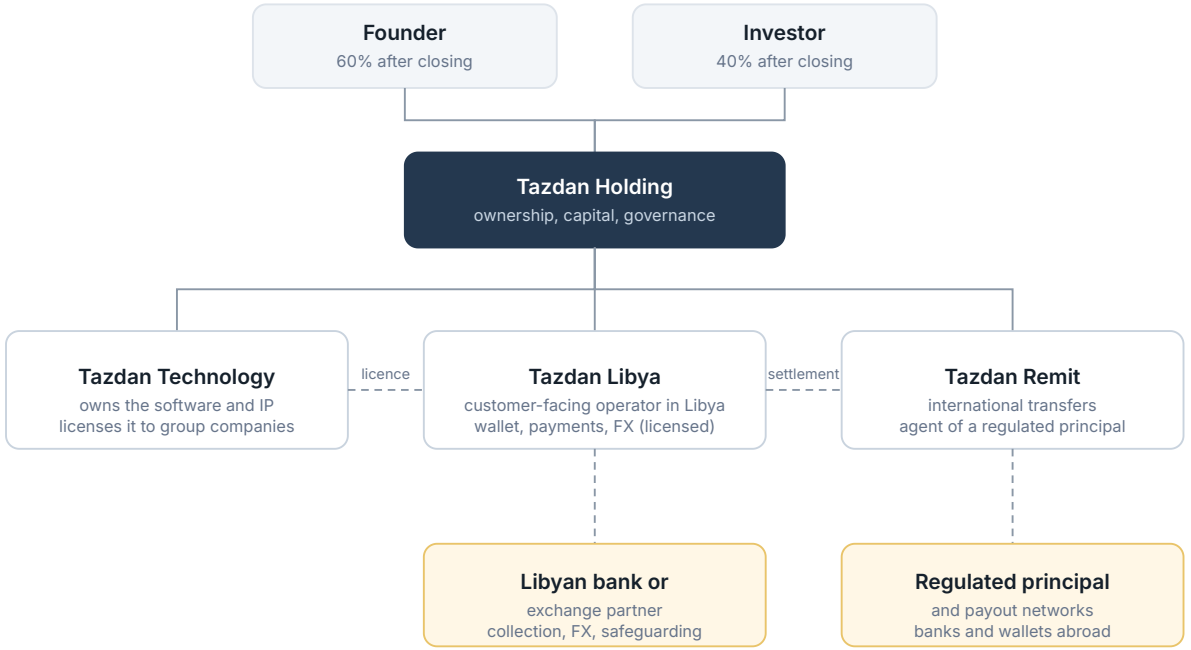

Free corporate cash by month

tazdan

STRUCTURE

Four companies, each with one job

Solid lines: ownership. Dashed lines: contracts. Amber boxes: outside partners to be signed. No entity has been formed yet; the holding-company jurisdiction will be chosen with counsel once receiving banks have reviewed the ownership and funding route.

- **Technology** owns the IP and never holds customer money.
- **Libya** serves customers under its own permission or an authorised partner's.
- **Remit** pays recipients abroad as agent of a regulated principal.
- Customer money is safeguarded and never funds operations.

tazdan

ROADMAP AFTER FUNDING

From closing to a live corridor

MONTHS 0–3

Foundations

Entities, key hires, licence route, partner bank, pen test, restore drill, opening reconciliation.

MONTHS 3–6

Pilot

Invited customers, capped limits, daily reconciliation; first software pilot signed.

MONTHS 6–12

Libya launch

Tripoli, then Benghazi and Misrata; FX within approved pricing; first rollout.

MONTHS 12–24

First corridor

One bankable corridor via a regulated principal; settlement facility.

MONTHS 24–36

Broaden

More corridors; cards and P2P where economics and permissions allow.

YEARS 4–5

Region

North Africa, MENA and the Gulf. Not in the forecast.

Nothing goes live until nine release gates are signed: authorisation, providers, security, money paths, device QA, recovery, operations, safeguarding and treasury. The software enforces this.

tazdan

RISKS

What could go wrong, and what we do about it

RISK	MITIGATION
Licensing delayed or refused	Launch under an authorised partner; software revenue needs no Tazdan licence
Bank acceptance of model or shareholders	Transparent ownership; receiving-bank review before closing; several banks in parallel
One-way FX flows and liquidity	Own prefunding then a settlement facility; quote halts when pools run low
Pricing limits	Model already assumes 0.45% all-in under a 0.50% guardrail
Security, fraud and financial crime	2FA, step-up checks, risk engine, screening, fraud graph; external pen test before launch
Key-person dependence	Phase-0 hires, extensive documentation, IP assigned to the group at closing

tazdan

THE PROPOSAL

An $18 million investment for 40%

$10M
new shares: capital for the company (22.2%)

$8M
existing founder shares (17.8%)

$45M
implied post-money equity value

60 / 40
founder / investor after closing

- Board of five: two founder, two investor, one independent chairing audit and risk.
- Investor consent on reserved matters: new shares, sale, borrowing, budget, new markets.
- Both portions priced the same; non-binding and subject to diligence.

- **Next:** confidential demo on fictional data.
- Investor onboarding: entity, beneficial owners, source of funds, bank review.
- Written indication of terms, then diligence with code access under NDA.

tazdan

Built. Ready for its partners.

This presentation is part of the Tazdan investor pack:

- Investor memorandum
- Corporate structure and governance
- Revenue models and pricing
- Integrated financial model (Excel) and summary
- Guerrilla growth playbook
- Product demo video and feature index
- Launch roadmap, risk register, evidence and sources

Confidential. Prepared by the founder of Tazdan for prospective investors. Not an offer to sell or a solicitation to buy securities. Forecasts are planning estimates, not promises. Licences, banking partners and live payment rails are not yet in place.
